CHE-HAO TUNG, BSN, RN

Software Engineer | Backend & AI Development | Healthcare Systems
Taipei, Taiwan | erictung911007@gmail.com | github.com/EricTung1007 | linkedin.com/in/erictung1007

PROFILE

Full-time software engineer with experience in enterprise AI, backend development, and data workflows, complemented by a B.S. in Nursing and RN credentials. Background spans local LLM inference, RAG, ERP development, and healthcare information systems, with direct knowledge of clinical workflows and safety-sensitive applications.

TECHNICAL SKILLS

Core: Python, SQL; working familiarity with JavaScript, C#, SAP ABAP, HTML/CSS
Backend / Data: SQLite, MySQL, REST APIs, stored procedures, JWT authentication; Node.js / Express maintenance
AI / Tools: RAG, FAISS, local LLM inference, LM Studio, prompt engineering, evaluation harnesses, Docker, Git/GitHub, .NET MAUI

ENGINEERING EXPERIENCE

Hualiteq International Corporation | 2026 – Present
Software Engineer (Full-time)

- Software engineer at an enterprise ICT solutions provider specializing in communications, contact-center platforms, systems integration, and AI-enabled customer solutions.

Cathay Holdings Digital, Data & Technology Center (DDT) | Feb 2026 – Jun 2026
AI Engineering Intern

- Optimized local LLM inference and developed prompt/evaluation harness workflows for enterprise AI use cases; contributed to vendor-independent AI pipeline architecture.
- Built a multilingual (EN/ZH/VI) promotional site for an LLM + RAG-powered AI Coach platform.

BenQ Guru | Jun 2024 – Mar 2025
Software Research & Development Intern

- Maintained an existing .NET MAUI cross-platform application; supported JavaScript/HTML frontend work, code review, and sprint planning.

Deloitte Consulting | Feb 2024 – Jun 2024
SAP ABAP Developer Intern

- Customized ERP workflows using SAP ABAP, implemented MySQL stored procedures, and produced technical documentation.

RESEARCH PUBLICATION

Enhancing Students' Critical Evaluation of AI Versus Human-Generated Literature Reviews: Deliberative Pedagogy
Kuo, W.-C., Pecanac, K. E., Tung, C.-H., Charles, P., Chen, H.-H., & Lauver, D. R.
Journal of Nursing Education | Preprint / Online | DOI: 10.3928/01484834-20261009-02

HEALTHCARE SYSTEMS PROJECTS

AI-Driven Prenatal Education Chatbot | 2024 – 2025
Principal Developer & Student Researcher

- Built a bilingual RAG chatbot with locally hosted Gemma-3-4B-IT, FAISS, Flask, and LINE integration, grounded in verified maternal-health content.
- Structured prenatal education content to reduce hallucination risk and align responses with government-verified health materials.

Code: github.com/EricTung1007/NTU-Nursing-Line-Bot

Low-Cost Long-Term Care Health Information System | 2026
Independent Project

- Maintained a prototype long-term care HIS with an existing Node.js / Express backend and SQLite database.
- Mapped MAR, vital signs, I/O, Morse Fall Scale, Braden Scale, and SOAP/DAR workflows; maintained JWT authentication flows.

Code: github.com/EricTung1007/HIS

CLINICAL & NURSING BACKGROUND

National Taiwan University Hospital | Apr 2023 – Sep 15, 2026
Clinical Training / Nursing Practice

- Completed rotations across medical, surgical, and specialty units, including nursing assessment, patient education, documentation, and bedside workflows.

EDUCATION & RECOGNITION

National Taiwan University | B.S. in Nursing | Registered Nurse

- Relevant coursework: 12 credits in Python, programming, data analysis, and machine learning.
- 2026 Global Health Innovation Grand Challenge: Grand Finalist, 1 of 8 teams from 48 global submissions.
- 2025 NTU Nursing International Forum: Poster on an AI-driven RAG chatbot for personalized prenatal education.
- TOEIC 925; GEPT High-Intermediate.
